

Snehapriya Murali

SOFTWARE TEST ENGINEER

Professional Summary

QA Engineer with **three years** of experience at **Swaas Systems**, specializing in **test case creation**, **ETL testing** and **automation testing**. Experienced in **manual testing** including **functional** and **regression testing**, leading to the identification of defects and significantly improving **software quality**. Strong **analytical** and **problem-solving** skills contribute to **effective collaboration** and high-quality results. Hands-on knowledge in **Cypress** automation framework; created personal **test suites** for web applications to practice **end-to-end** automation, including **API testing** and **UI validations**.

Education

Bachelor of Computer Applications - BCA,
DKM Arts and Science College, Vellore

Experience

Software Test Engineer, Swaas Systems, Chennai

08/2023 - Present

Project: ELE (ETL & Web Application Testing)

- Validated **ETL pipelines** and **data transformations** in **Apache Airflow DAGs** to ensure successful execution and **data integrity**.
- Performed **end-to-end ETL testing** including **data ingestion**, **transformation**, and **loading** into **AWS Redshift** and **MySQL**.
- Conducted **data validation** and **reconciliation** between **source and target systems** using **complex SQL queries**.
- Tested integrations across **AWS Step Functions**, **AWS Lambda**, and **Amazon S3**.
- Developed and maintained **business rule-driven test data** to ensure accurate **data flow** and successful **data ingestion** into target systems.
- Monitored **job executions** and alerts using **AWS CloudWatch logs and metrics**.
- Executed **regression testing** after code changes to maintain **data accuracy** and **system stability**.
- Verified **edge cases** and **business rule validations** before data ingestion into target systems.
- Performed **functional testing**, **regression testing**, **UI testing**, and **cross-browser testing** to ensure **application reliability**.
- Logged, tracked, and collaborated with developers to resolve **defects** efficiently using **defect tracking tools**.

Project: Impact Radius - Disney (ETL and Web Application)

- Performed **ETL and web application testing**, including **Airflow DAG validation** using **Pytest**.
- Collaborated with **US clients** in **daily stand-ups** and **sprint demos**, presenting testing progress and deliverables.
- Executed **SQL data validation** in **Snowflake** and **PostgreSQL** after dag completion.

Personal Details

Chennai,
India

Skills

- Test Case Design
- Functional testing
- Regression testing
- Cross-browser testing
- Agile/Scrum
- Database Testing (SQL)
- AWS S3, Step Functions, Cloudwatch
- Data Validation
- Data Reconciliation
- Cypress
- API Testing in Postman
- Root-cause analysis
- Time management
- Bug tracking and reporting
- Effective communication
- Test progress Dashboard Creation
- Apache Airflow
- Javascript

- Validated **Sankey** and **graph visualizations** by cross-verifying **database** data with **UI** and ensuring **accuracy of network topology connections**

Project: Cypress E-Commerce Automation Framework

- Designed **Page Object Model Based Cypress Automation Framework**
- Automated **Login, Product, Cart and Checkout workflows**
- Implemented **reusable page classes** for scalability
- Validated **UI elements** and **end-to-end checkout flows**

Certifications

**API Fundamental Students
Expert Badge,
Postman**

06/2025

**Cypress Automation,
Vskills**

03/2025
