

Prabavathi – Senior Android | Flutter Developer

Mobile: +91 8973046801 | Email: prabavathi250497@gmail.com | Location: Chennai, India

Professional Summary

Senior Mobile Application Developer with 6+ years of experience specializing in Android Native (Java/Kotlin) and Flutter. Proven expertise in designing and delivering scalable, cross-platform mobile solutions with secure architecture and exceptional UI/UX. Skilled in state management (Provider, BLoC), Firebase integration, CI/CD pipelines, payment gateway integration (Razorpay, Plaid, Braintree), and analytics (Mixpanel, Kochava, Sentry). Adept at Agile/Scrum methodologies, performance optimization, and mentoring teams. Delivered apps achieving 35% faster load times, 20% higher user retention, and 99% crash-free stability across multiple domains (finance, e-commerce, education, service).

Core Competencies

- Android Native (Java, Kotlin)
- Flutter
- REST APIs, Firebase
- SQLite, MySQL, Firestore
- CI/CD Pipelines (GitHub Actions, Firebase, AWS)
- Agile & Scrum
- Payment Gateways: Razorpay, Braintree, Plaid
- Push Notifications: Firebase, OneSignal
- State Management: Provider, BLoC
- Version Control: Git, GitHub
- Cloud: Firebase Cloud Functions, AWS Basics
- Testing: Unit Testing, Widget Testing, TDD
- Tools: Android Studio, Xcode, VS Code, Postman, JIRA
- Problem-Solving, Communication, Team Collaboration, Leadership

Work Experience

Vishgyana Technology, Chennai | Aug 2019 – July 2025

Senior Android & Flutter Developer

- Designed, developed, and deployed multiple Android (Kotlin/Java) and Flutter applications for e-commerce, finance, and service industries.
- Published and maintained apps on Google Play Store and Apple App Store with strong focus on performance, security, and UI/UX.
- Integrated REST APIs, Firebase services, third-party SDKs, and optimized data synchronization across devices.

- Implemented payment gateways (Razorpay, Plaid, Braintree) and real-time push notifications.
- Enhanced app performance by reducing ANRs, memory leaks, and optimizing build pipelines.
- Conducted unit and widget testing, ensuring clean architecture and scalability.
- Mentored junior developers on Android and Flutter best practices.

Key Projects

Ambika Chit Web

Technologies: Flutter, Provider, Mixpanel, Sentry

Description: The web-based Flutter application manages receipts, transactions, and customer details with easy tracking and export options. Employee data is organized with route assignments and attendance monitoring.

Responsibilities:

- Overhauled code structure, reducing bug frequency by 30%.
- Integrated Mixpanel logging, cutting issue-resolution time by 25%.
- Delivered new features that improved operational efficiency by 40%.

OneGold

Technologies: Flutter, Firebase, Provider

Description: OneGold mobile app for buying, selling, and redeeming vaulted gold, silver, and platinum with 24/7 access and automated investing features.

Responsibilities:

- Built credit card payment integration, boosting successful transactions by 20%.
- Fixed critical bugs in Plaid payment gateway, improving transaction reliability to 99%.
- Implemented withdrawal and limit order modules, enhancing customer adoption by 15%.

APMEX

Technologies: Flutter, Firebase, Provider, Sentry, Kochava

Description: APMEX app for trading Gold, Silver, Platinum, and Palladium including rare coins and collectibles.

Responsibilities:

- Developed UI and API modules for bullion and products, reducing API response time by 18%.
- Integrated Plaid Pay gateway for seamless global transactions.
- Added Freshchat live chat, increasing customer support response rate by 30%.

- Configured Kochava + Sentry analytics, reducing app crash rate to <1%.

CartLine Retail App

Technologies: Kotlin, Java, Firebase, SQLite

Description: Retail cart system with barcode scanning, checkout, store locator, and Razorpay integration.

Responsibilities:

- Optimized API calls, achieving 35% faster load speed.
- Reduced checkout time by 40% through barcode and payment automation.

Service Manager App

Technologies: Java, Android SDK, Firebase

Description: Field service management app with offline/online sync for engineers.

Responsibilities:

- Improved engineer productivity by 25% through offline sync.
- Reduced ticket resolution time by 15% using push notifications.

SRM Customer App

Technologies: Flutter, Firebase

Description: Complaint management system with secure login and notifications.

Responsibilities:

- Improved adoption by 20% with secure login and multi-device testing.
- Reduced release cycle by 30% with CI/CD pipeline automation.

ERP One

Technologies: Flutter, Firebase

Description: ERP modules for inventory, HR, and finance with real-time location tracking.

Responsibilities:

- Improved operational efficiency by 35% via ERP automation.
- Reduced bug resolution time by 40%.

ZZUP Customer App

Technologies: Flutter, Firebase, Provider

Description: Food delivery app with Razorpay payments and Google Maps integration.

Responsibilities:

- Achieved 98% transaction success rate with Razorpay integration.
- Enhanced order tracking accuracy by 25% with real-time notifications.

Vee2care Parent App

Technologies: Flutter, OneSignal

Description: School-parent communication app with calendar, homework, and media sharing.

Responsibilities:

- Increased parent engagement by 30%.
- Reduced admin workload by 20% via digital automation.

Education

MCA – Computer Applications | Muthayammal Engineering College, Namakkal | 2017–2019
| 85%

BCA – Computer Applications | Nethaji Subash Chandra Bose College, Thiruvavur | 2014–
2017 | 84%
